Sii Poland Hiring Team Hiring Team Sii Poland

I am writing to express my enthusiastic interest in the AI/ML Principal Software Engineer position, which I discovered on your careers page. With a career dedicated to building high-performance, scalable software, I am confident that my skills and extensive experience are an excellent match for the requirements of this role.

My professional background includes over seven years of hands-on experience in architecting, developing, and deploying complex, production-grade software systems. I have a proven track record of leading technical projects from the initial design phase through to successful implementation and maintenance, with a particular focus on AI and machine learning environments.

My technical qualifications align directly with your specified needs. I am highly proficient in backend technologies, including Python (with frameworks like Django and Flask) and Java (with Spring Boot). My skill set also extends to the frontend with experience in frameworks like React. A core component of my expertise lies in modern DevOps and cloud-native practices; I have a strong background in containerization with Docker, orchestration with Kubernetes, and designing scalable, resilient architectures on AWS. I am adept at leveraging these technologies to build and manage sophisticated, high-availability systems.

As a current resident of Poland and fluent in English, I meet all the prerequisites for this position. I am deeply impressed by Sii Poland's reputation as a technology leader and am eager for the opportunity to contribute my expertise to your innovative projects.

Thank you for your time and consideration. I have attached my resume for your review and look forward to the possibility of discussing how my experience can be a valuable asset to

your team.

Tinoudashe Hapson Marecha

Sincerely,

Tinoudashe Hapson Marecha
