Professional Summary

Full-Stack Developer with 3+ years of professional experience building SaaS, AI, and cloud applications using React.js, Next.js, and Spring Boot. I specialize in crafting user-focused frontends (helped lift conversion by 5.6%) and building reliable backend APIs. I'm also experienced in designing scalable database architectures and delivering polished reusable UI components in React.

Experience

Full-Stack Developer - Freelance via Upwork

Jul 2022 – Mar 2025

Built scalable SaaS and mobile applications using React.js, Next.js, Spring Boot, and Flutter. Designed...

AI Engineer - Self-Employed

October 2023 - Present

Engineered & Deployed AI Solutions: Designed, developed, and deployed advanced machine learning models focusing on predictive analytics and data-driven insights. Successfully containerized applications using Docker for scalable and efficient deployment. Full-Stack Project Development: Executed a full-cycle project involving the creation of a sophisticated front-end with React and a robust back-end using Django, demonstrating comprehensive full-stack capabilities. Optimized Data Processing: Implemented robust data preprocessing and cleaning pipelines, which enhanced data quality and improved the accuracy of resulting AI models by over 20%. API Integration: Developed and integrated RESTful APIs to ensure seamless communication between the front-end, back-end, and machine learning models. Location: Gdansk, Poland

Apprentice Training Artisan Class One - Delta Corporation

1996 - 2000

Completed a comprehensive four-year apprenticeship program in Motor Mechanics. Gained hands-on experience in vehicle diagnostics, engine overhauls, and electrical systems. Rotated through various specialist sections of the workshop. Key Achievements: Graduated as a Class One Journeyman, achieving the highest possible grade in the final trade test.

Skills
