Professional Summary

Results-driven Software Engineer with over 3 years of experience in building and optimizing scalable backend systems for SaaS and FinTech platforms. Expert in Java, Spring Boot, and RESTful API development, with a proven track record of improving application performance by 15% and driving user conversion. Skilled in database design (PostgreSQL, MySQL) and agile development methodologies.

Experience

Full-Stack Developer - Freelance - Upwork

start='Jul 2022' end='Mar 2025'

- Engineered scalable backend services and RESTful APIs for diverse SaaS clients using Java and Spring Boot, delivering solutions that met critical business requirements. - Architected and managed high-performance PostgreSQL and MySQL databases, significantly improving system responsiveness and data processing efficiency. - Spearheaded a code refactoring project that boosted application performance by 15% and improved overall code maintainability and scalability.

Technical Support Advocate - Foundever (BPO)

start='Jan 2023' end='Apr 2025'

- Resolved complex technical issues for enterprise FinTech clients (including Block Inc.) involving SaaS platforms and RESTful API integrations, ensuring high levels of client satisfaction. - Served as the Subject Matter Expert (SME) for RESTful APIs, guiding clients on integration best practices and troubleshooting critical data transfer problems. - Bridged the gap between clients and development by translating user-reported issues into detailed technical specifications and bug reports, expediting the resolution cycle.

Full-Stack Developer - Alpha and Omega MedTech

start='Jun 2021' end='Sep 2022'

- Increased user conversion by 5.6% through the development of new RESTful APIs and enhancement of core backend features using Java and Spring Boot. - Engineered and optimized MySQL database schemas and queries, achieving 99.9% uptime and ensuring robust processing of thousands of daily transactions. - Operated effectively in an Agile environment, collaborating in bi-weekly sprints with product and QA teams to design, develop, and deploy new platform functionalities.
